The IFAA in 2013 / 2014

The International Federation of Adjusting Associations continues to be the only global representative organisation encompassing all the significant Adjusting Associations around the world. With 14 Associations and over 600 Fellows using the recognised and coveted FIFAA designation, we are striving to achieve even more global recognition the role of loss adjusting. The IFAA seeks to provide its Member Associations and Fellows with support and representation. Showcasing the present challenges faced by the industry in as many geographical locations has been our priority. In order to encourage greater participation from younger loss adjusters we are due to introduce the Associate level AIFAA designation shortly.

Association of Indonesian Insurance Adjusters APKAI

We proudly announce the addition of APKAI, Indonesia into the Federation, further expanding the IFAA's global presence. APKAI's current President is Mr Budi Maharesi, a practising Loss Adjuster. Discussions are underway to explore the running of an IFAA Educational Conference in Indonesia during 2015.

New President 2013 / 2014

The IFAA welcomes SLALA, the Sri Lanka Association of Loss Adjusters to the new Presidency of the IFAA. Nihal Bogahalande is representing SLALA as the President.

Nihal brings to the IFAA board over 35 years of loss adjusting risk management and engineering knowledge.

To contact Nihal his email address is president@adjustersworldwide.org

ALOSI 2014 / 2015

In June 2014 the Chilean Association of Independent Loss Adjusters (“ALOSI”) assumes the Presidency of the IFAA. Currently ALOSI is the first, and only, Latin American adjusting association in the IFAA. Founded in 1966, its members are individual loss adjusters who have completed the respective exam of Chile’s Securities and Insurance Superintendence (“SVS”) and who have pledged to abide by the Association’s Code of Ethics.

Photo - Juan Pablo Valdivieso, ALOSI President

ALOSI maintains fluid communication with the SVS with regards amendments to the applicable legislation, such as the new Regulations for the loss adjustment procedure and the new Insurance Law. Communication is more intense at times of catastrophes, such as the 2010 earthquake/tsunami.

ALOSI continuously supports seminars organised by Chile’s Association of Insurers, the most recent being “Lloyd’s Chile Insurance Day” in London and also the local/international courses of their Insurance School.

ALOSI is looking forward to working closely with the Member Associations of the IFAA, and encouraging other adjusting associations in Latin America to join the IFAA.

More info at www.alosi.cl

Events 2014

IFAA Focus Session, 20th November, Colombo, Sri Lanka

To accompany the Sri Lankan Insurance Industry’s Convention in Colombo the IFAA hosted a Focus Morning at the same venue on the subject of Energy Insurance and Claims and Risk Issues.
